PRESS RELEASE

For Immediate Release
December 2011

ONE SUN INC. HAS COMPLETED INSTALLATION OF 600 kW SOLAR PV SYSTEM FOR THE CONTRA COSTA UNIFIED SCHOOL DISTRICT IN CALIFORNIA

One Sun Inc., a Northern California-based solar systems provider, announced that it has completed the installation of a 600 kW solar system for the Contra Costa Unified School District. Installations consist of ground mounts and custom-designed carport structures at the District's Pleasanton, CA, Administration Building and the Mauzy School in Alamo, CA. The system will offset 100% of the buildings' total energy costs and will pay for itself in 12 years. The project was financed primarily through funds from qualified school construction Bond Measure L, passed by county voters in November 2010 and the California Solar Initiative rebates. Together with other planned installations the District expects the conversion to solar energy will save \$28 million over the life of the panels. By integrating solar energy, the School District will reduce operating expenses and ease the pressure on strained financial resources; more resources will now be available for educational supplies and books. One Sun, Inc. is proud to be part of the District's decision to integrate renewable energy and is committed to supporting efforts of schools to reach their goals through designing and installing solar PV systems that result in savings that can then be available for essential educational materials.
