ONE SUN INC. COMPLETES INSTALLATION OF 157.92 kW SOLAR PV SYSTEM FOR SONOMA/MARIN MOSQUITO & VECTOR CONTROL DISTRICT

One Sun Inc., a California-based provider of high-performance commercial solar pV systems, announced that it has completed the installation of a 157.92 kW solar PV system for the Marin/Sonoma Mosquito & Vector Control District (MSMVCD) at their headquarters in Cotati, CA. MSMVCD is a local public health agency serving the entire Marin/Sonoma area. It promotes health and well being by protecting the public from mosquito-borne disease through education, surveillance, source reduction and control.

The arrays include 658 high-performance solar modules installed on the main office building and the parking garage. The installation incorporates a monitoring system and an electronic security system for all modules. Federal, State and County funds and incentives contributed significantly to the financing. This system will provide 100 % of the district's electricity needs. It is estimated that the system will be paid for in approximately 10 years and, by converting to solar energy, MSMVCD estimates it will save close to \$40,000 per year.

“At MSMVCD we are always looking for innovative ways to cut costs and better the environment,” said Steve Delucchi, Shop/Facilities Coordinator. “The installation of these solar panels will reduce our carbon footprint, save energy, and maintain MSMVCD as one of the most cutting edge mosquito districts in the State. ”

One Sun Inc. *is a leading California provider of commercial and public works grid-tied solar photovoltaic systems. Our clients include the County of Sonoma, the City of Santa Rosa, Sonoma County Unified School District and a number of area wineries.*
